Experts in Design, Supply and Installation of Facades and Recladding

About Us

Building Excellence Since 2018

Founded by CEO Kamil Kopec, EK Construction Ltd. has rapidly emerged as a leading force in the UK construction industry. Our journey began in 2018 with a vision to deliver exceptional quality and innovation in every project we undertake.

Specialising in facade solutions, we offer comprehensive services including design, supply, and installation of various facade systems, curtain walling, cladding and windows. Our expertise extends from new builds to recladding projects, big or small, always with a focus on enhancing both aesthetics and functionality.

We pride ourselves on transforming your architectural visions into reality. Our portfolio spans a diverse range of projects, from student accommodations to commercial complexes, each showcasing our dedication to excellence.

What sets us apart:

- Highly skilled team of professionals
- Commitment to site safety
- Tailored solutions for each unique project
- Close working relationships with industry-leading suppliers

Opening Hours: Monday to Friday 08:00 to 17:00

Phone: 02089162231

E-mail: office@ekconstruction.uk

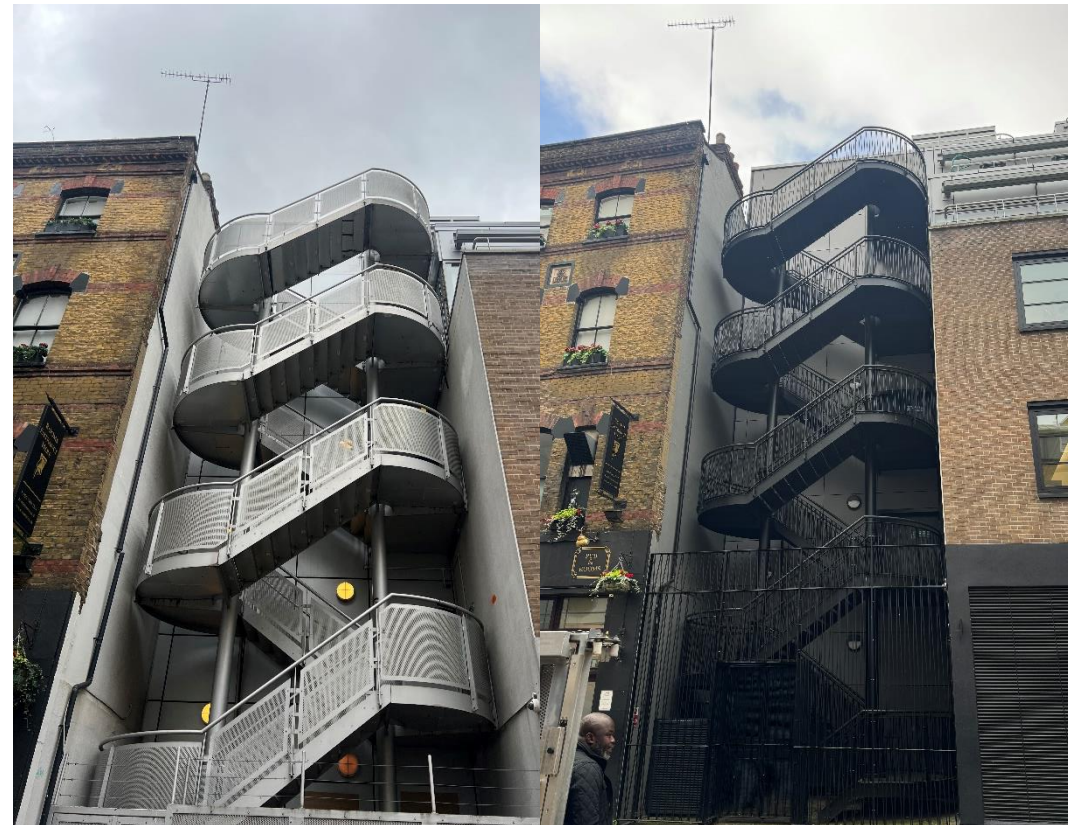

Address: Unit 11E, 22 Carlton Road, South Croydon, CR2 0BS

Comprehensive Recladding Expertise

Our extensive expertise in facade installation uniquely positions us to provide valuable insights and design recommendations for both new cladding and recladding projects. From the initial design phase, we offer detailed consultations, leveraging our experience to guide clients effectively.

Our specialised knowledge is particularly beneficial in recladding projects, where we excel in surveying existing cladding systems and planning an efficient removal processes. This allows us to provide detailed, actionable advice on the necessary steps for successful project execution, ensuring optimal results whether installing new facades or renovating existing ones.

Project Portfolio

Our expertise spans projects of all scales, allowing us to adapt our resources and capabilities to suit your specific requirements.

From global corporations such as Hitachi, esteemed clients like McLaren, work on iconic HM Government buildings in London, as well as smaller projects for local main contractors, we have demonstrated our versatility across this broad spectrum of clients and projects of various scales and complexities.

Project Highlights

Ravensbourne Park

We proudly completed the Ravensbourne Park project in January 2024. The project involved the supply and installation of Equitone Linia panels, aluminium backing structure, insulation, cavity barriers, and aluminium fins.

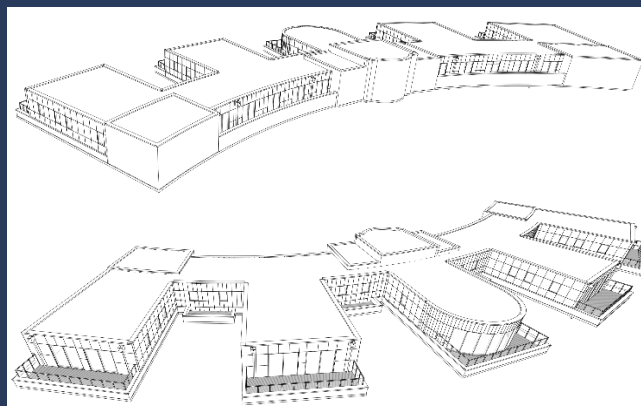

By February 2024, the new homes were ready for occupancy, providing the local community with stunning residences and a great-looking building.

Grand Ocean

The Grand Ocean is an iconic listed building in Brighton. We were honoured to be involved in the recladding of this building. Our work included the removal of combustible materials, design, and installation of a new non-combustible cladding in coordination with our client and architect.

The new cladding features Hardie panels, a stainless-steel backing structure, insulation, cavity barriers, and new sheathing board. We are proud to have contributed to such an important project for the local community.

Little Ilford School

The Little Ilford School project presented unique challenges due to the building's shape, but the results were well worth the time and effort invested.

Our work involved the installation of Anvil secret fix panels supplied by Taylor Maxwell, along with an aluminium backing structure, insulation, and cavity barriers.

Design to Completion

The Threadneedle House project, located in the centre of Chelmsford opposite the local council authority, was completed in 2023. This project transformed the building from offices into 68 new apartments. We were involved in the design, supply, and installation of the new facade.

For this project our work included installing SFS in the old window openings, an aluminium backing structure, cavity barriers, and A1 Vitradual aluminium panels. Despite the challenges, we successfully modernised the building, contributing to the creation of beautiful new homes for the community.
